Servo Drive Lead Edge Feeder

The ADI/PDM Full Vacuum Lead Edge Feeder can be retrofitted to any press from a mini to jumbo sizes to improve feed accuracy and registration. Driven by a reliable, efficient servo drive system. Most current mechanically driven feeders can be upgraded to our state of the art technology.

Features:

- Lead-edge feed vacuum table
- Driven feed rolls with adjustable nip
- Adjustable side guides mounted on linear bearings
- Adjustable feed gates mounted on linear bearings
- Adjustable support tail box for rear of feed hopper
- Dual servo motors
