L & W Laser Alignment System

Patented Product

Let us fix your problem with a new high-speed Counter-Ejector...

The precision laser alignment system provides a laser line to set up scoring heads, slotter heads, slitters or die-boards on Rotary Die Cutters. Using this system eliminates the operator having to setup the machine with one hand while holding a ruler in the other. Setup times can easily be reduced by more than 50%. Safety is also dramatically increased by allowing the operator to have both hand free during setup.

- Precision Ground THK Linear Bearings for smooth, precise operation
- Heavy-duty, high quality laser provides bright, clear line, for easy operator setup
- Standard model equipped with manufactured measuring system, calibrated to machine specs
- Multiple axis precision-machined laser aligning mounting system
- Rotating laser bar for aligning multiple points
- Heavy-duty steel frame for durability
- Much, much more...

We manufacture Folder-Gluers, top or bottom fold, in-line or off-line, mini, medium or jumbo and Downstackers...
