

THE DOVEY SD9.8/X WOVEN CORRUGATOR BELT

Because belt is pre stretched, only enough tension is needed to establish traction between belt and paper. Lower tension means:

***less machine wear * less maintenance * less power consumption.**

The lacing is *crimped* into the belt, which is then compressed thereby concealing the lacing with a canvas cover sealed with silicon.

The SD9.8/X belt is guaranteed to perform at least as long as any previously used belt, because it is

- More durable.
- Tracks perfectly.
- Runs with less tension.
- It is the easiest of ANY belt to clean.

The SJ DOVEY belt is priced to be competitive and commands the best performance ratio per dollar cost (million square feet board - \$)
