

ROLL STOCK END CAPS THAT PROVIDE PROTECTION FOR ROLL STOCK STORED IN THE OPEN.

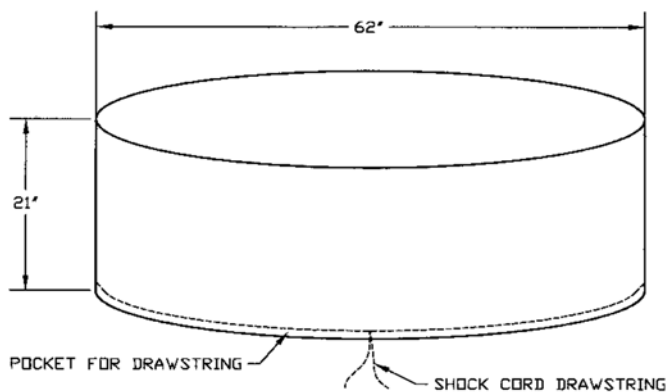

Used for covering the top end of paper products when stored outdoors, roll stock caps are an economical way of creating storage space outdoors.

Raw material paper rolls are generally stacked on end 2 or 3 rolls up, in order to use less storage space, before going to the corrugator.

Using a single roll stock cap on the top "cylinder" of paper will protect all of those below from rain penetrating the open and exposed ends of the paper, and eliminating the possibility of flat spots forming.

The cap is supplied in the following configuration.

62END-12MIL-DSS ROLL STOCK END COVER
62" DIAMETER X 21" TALL
12 MIL POLY - SILVER SIDE OUT

- The end cap (The cap is a cylinder cover, using heavy-duty 12mil / 7oz, woven coated, domestic polyethylene, UV, rot and mildew resistant and waterproof.
- The hem contains an elastic draw cord to keep the cover in place during wind and rain.
- The poly material has the Silver side out to deflect heat to help prevent condensation and heat build-up. The caps are supplied in the following dimension:

62" DIAMETER X 21" TALL - END CAPS 12MIL POLY (SILVER SIDE OUT) BOTTOM TO HAVE A SHOCK CORD DRAWSTRING. **Part Number: 62END-12MIL-DSS .**

- All of the caps are sized at 62" diameter before so they will fit 58" diameter rolls. All of the caps are Silver/Black 12 mil / 7oz, woven coated, 4-ply domestic polyethylene top and sides for a waterproof seal.
