

KELVA Brakes

B0.6, B1.5, B3.0

Improved Quality

With KELVA's High or Low Friction Brakes

- Fully air operated
- Constant web tension
- Easy to maintain and install
- Reliable high quality standards
- Three different sizes, each available with high or low friction brake pads

Kelva brakes are designed for many different applications. Our three brake sizes, all of which can be equipped with high or low friction pads, cover braking requirements for a wide variety of materials. As they are pneumatic and therefore explosion-proof, they can be used in conditions where electrically operated brakes would be unacceptable.

Dovey Corp. is an authorized distributor for all Kelva Products
3220 W. 25th St., Anderson, IN 46018, Phone: (800) 457-2576
