

Web Cleaning System for Corrugated Board

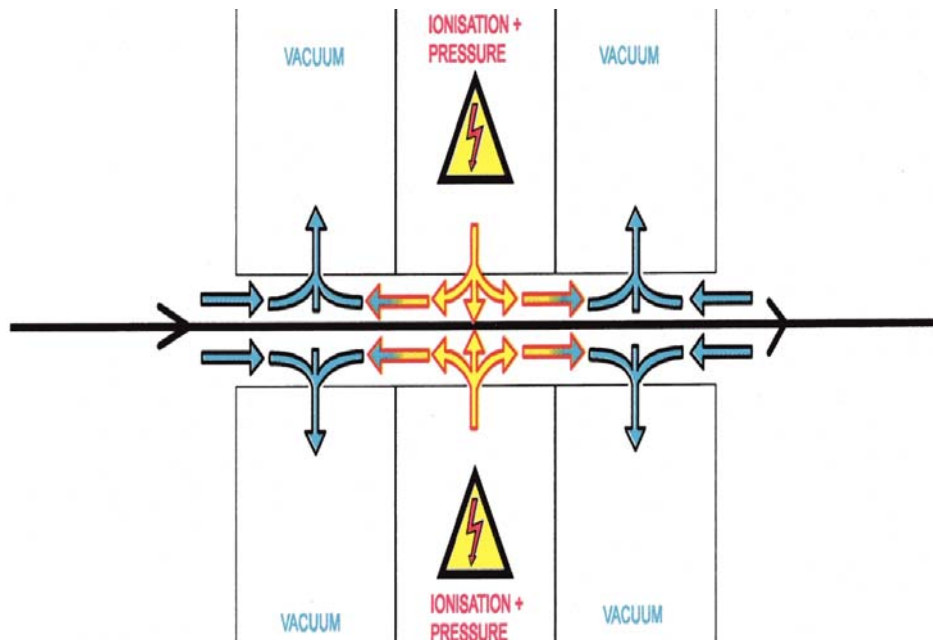

Kelva's highly effective Corrugated Board Cleaner, with its guaranteed non-contact cleaning principal, combines full speed production with full width cleaning on both sides.

Automatic height adjustment and a self cleaning filter guarantee continuous production with measurable decrease of environmental dust, resulting in a much better product, ready to be printed.

Simplify Life - With the Right Web Cleaning

- Non-contact double-sided full width board cleaning
- Active anti-static devices integrated
- Automatic self-cleaning filter/fan unit
- Automated operation with raise/lowering of the cleaning heads on order change
- Adaptation to different flute thickness and down-time cleaning
- Semi-closed loop operation with no influence on environment and emission.
- Single web system for use behind slitter/scorer
- Significant reduction of shingling dust
- Reduction of metal particles from sharpening the slitter blades
