Contact Web Cleaners...

Model LC

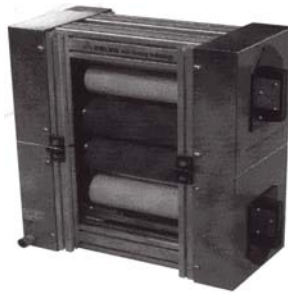

Kelva's Label Clean is our most compact web cleaner. The Label Clean is specifically designed for narrow web applications such as label printing but can handle web widths to 1300mm.

- Cleans label stock, film and foil up to 400m/minute
- Easy to build into new and existing machines
- Low silicone polymer roller
- Single-sided cleaning

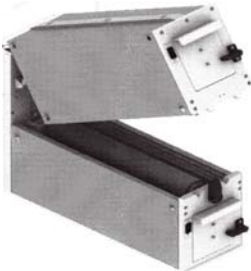

Kelva's Model WWC is our Wide Web Cleaner. It cleans film, foil from and label paper from 600mm to 1300mm wide.

- Single or double sided cleaning
- Web speeds up to 400m/minute
- Pull out function for side access to adhesive rolls

Model WWC

Model CWC®

Kelva's latest single or double-sided web cleaner is suitable for speeds up to 350m/minute and widths from 250mm to 1000mm. Its crocodile opening allows easy web threading and access. The static discharger prevents the web from reattracting dust after cleaning. It also features continuous cleaning, improved performance, and high machine speeds.

Model WWC MR

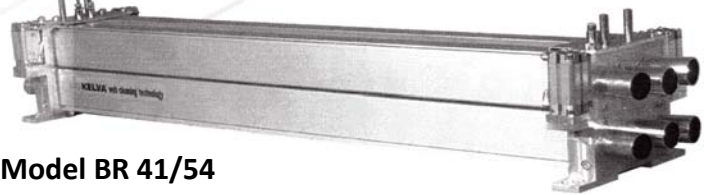

Model WWC MR was developed as a user-friendly solution for wide-web applications. It has twin adhesive rolls with side pull-out for roll change and continuous cleaning during adhesive roll change. Double sided cleaning for wide webs from 1400mm to 2100 mm and for web speeds up to 400m/minute.

Kelva Fluid Leveler and Brakes

Liquid Level Control (2 models) and 3 different brake sizes. Replacement Parts available.

Non-Contact Web Cleaner...

Model BR 41/54

Model BR 41 for Paper, thin board; Model BR 54 for film, foil, and textiles.

- Cleans both sides simultaneously
- Effective 3-chamber solution
- Flexible to install and easy to adjust

Corrugated Web Cleaner...

- Non-Contact, double-sided full width board cleaning
- Active anti-static devices
- Automatic self-cleaning
- Adaption to different flute thicknesses
- Single web system for use behind slitter/scorer

Kelva Pumps

Kelva has revolutionized the double-diaphragm pump from our reliable IP series to our side mounted VP series in many sizes. Both can handle almost any application and fluid. Check out our new model LF on our web site.
