

MAXXSCORE™

Patented Male Score Ring

For scoring on Flexo Folder Gluers and RDC's

Produces stronger, squarer boxes with less fishtail and a more consistent gap between the top and bottom flaps at the glue/stitch tab...

- Panels can fold to 130° without resistance;
- Reduces the chance for false, cracked and rolled scores;
- Direct replacement for existing scoring rings;
- Long lasting;
- For all makes and models of Flexo Folder Gluers, Printer Slotters and Rotary Die Cutters;
- Extensive worldwide installations; and
- Unique patented design.

Five years of development and testing by a leading German corrugated production equipment manufacturer, resulted in this remarkable new **MAXXSCORE™** Scoring Ring. Since its introduction, over 800 installations have been made around the world with results exceeding expectations. Now this revolutionary Scoring Ring is available in the USA, Canada, Central and South America exclusively from **HMB Manufacturing & Supply Co.**

MAXXSCORE™ is guaranteed to improve your corrugated scoring operations. Conventional scores only allow panels to fold to approximately 90° before they "go tight". With the **MAXXSCORE™**, panels can fold to approximately 130° before encountering resistance. This reduces the chance for false and rolled scores, enabling your machine to produce stronger, squarer boxes with less fishtail and consistent gaps at the manufacturing joint.

In recent years, many attempts have been made to solve scoring problems, T-belts, vacuum belts, "lazy arm" folders, pre-creasing and stronger spankers have all been tried with little success.

MAXXSCORE™ is the first to offer positive improvement over previous methods.

The **MAXXSCORE™** Score Rings are a direct replacement for existing score rings. They are designed to fit all popular Flexo Folder Gluers, Printer Slotters or Rotary Die Cutters, including...

- Koppers, Hooper, United (most models);
- Langston (most models)
- Ward (all models);
- S & S (all models);
- Martin/Bobst Martin (most models);
- Emba (most models);
- TCY (some models);
- Rapidex (some models);
- Let us know the make and model of your machine, we might make others if we have drawings available.

Over 800 satisfied users report excellent results. Here are some of the responses that we have received:

- "Fantastic";
- "Remarkable results, has eliminated all rolled scores";
- "Has eliminated cracked scores on light-weight recycled liners"
- "Gap variation greatly reduced";
- "Fishtail greatly reduced";
- "now want to buy for my other FFG's".
