Servo Drive Lead Edge Feeder

Bendazzoili's FineMech Line of Traditional Flexo Folder Gluers and Rotary Die Cutters

FineMech is Bendazzoli's traditional open and close production machine. It meets high standards of precision and will produce Tri-wall in any size. Special attention needs to be given to our Jumbo line, 74" x 145", 74" x 165", 74" x 189", 92" x 165", 92" x 189" and 92" x 212". Tandem/Dual Slotting available in all models. Made in Italy.

Wagner Industries manufactures three different Upper Feed Rolls...

The Quickroll™ Feed Roll. Never change out another feed roll again. Replace sections right on the shaft. Duoflex™ never gains durometer or goes soft. Available in 35 or 40 durometer.

Duoflex™ Feed Roll made from our 40 durometer Duoflex™ urethane. Solid covering.

No Crush Feed Roll. Made from our 60 durometer proprietary urethane

ADI/PDM's Servo Drive Lead Edge Feeder

This powerful vacuum, servo-driven Lead Edge Feeder can be retrofitted to any press from a mini to jumbo sizes. It has dual servo motors and driven feed rolls with adjustable nip. Adjustable feed gates and side guides are mounted on linear bearings. Most current mechanical driven feeders can be upgraded to our state of the art technology. Made in U.S.A.
