

THE AUCLEAN CHAMBERED DOCTOR BLADE SYSTEM

Auclean's unique Chamber is machined from the **latest aluminum alloy used in the aviation industry by a special process.** The special magnetic characteristics of the chamber make it more convenient for the operator to install the doctor blade. **The outer surface of the chamber is treated with anode oxidized technology** and the inner surface with Teflon. This coating reduces the possibility of ink adhering to, and drying in the chamber while in operation, thus an easy clean up.

ADVANTAGES:

Replacement of the conventional

rubber roll and fountain pan.

Decreases start up time.

Improves consistency of printing/coating quality.

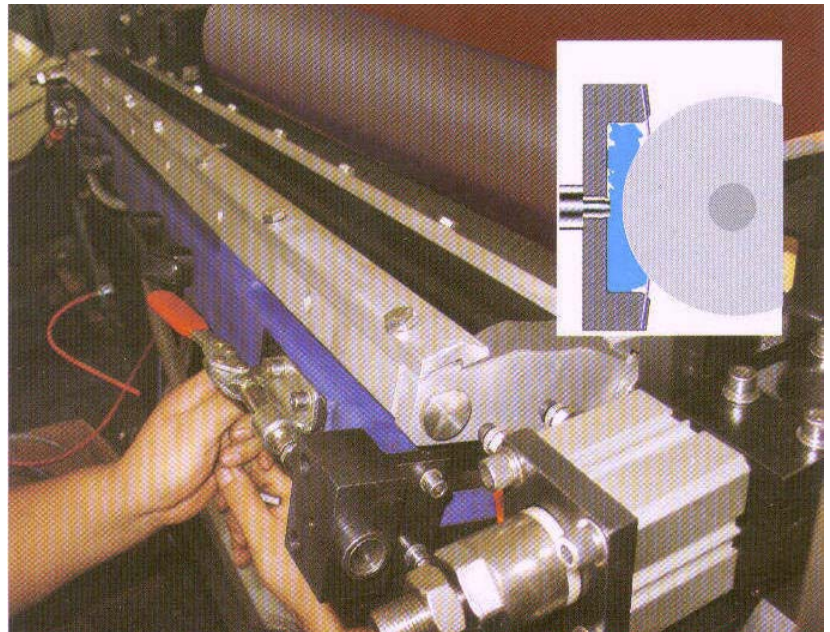

Easy retrofit to existing machinery.
Less ink waste.

Decreases VOC emissions,
more consistent in ph and viscosity .

Fast clean-up.
Requires little maintenance.

Makes for faster production speeds. Customized design.
