

THE EXAIR DRUM VAC.

**Pump 55 gallons in 90 seconds!
Two-way pumping action!**

What Is The Reversible Drum Vac?

A safe, maintenance free way to recover:

- Coolant • Sludge and chips
- Hydraulic oils • Tramp oil
- Liquid spills • Waste water

Advantages

- No moving parts
- Maintenance free
- Stainless steel construction
- Safe – no electricity
- Built-in pressure/vacuum relief
- Compact and portable
- Installs quickly
- Spill free – auto safety shutoff
- Fits standard closed head drum

Why The Reversible Drum Vac?

EXAIR's compressed air operated Reversible Drum

Vac System attaches quickly to any closed head 55 gallon (45 imperial gallon) drum. Its high powered vacuum fills the drum in less than two minutes.

With the simple turn of a knob, the same stainless steel pump quickly empties the drum. Coolant sumps can be easily refilled, & floor spills vacuumed. Contaminated liquids transferred to filtration tanks in minutes.

The flow rate in and out of the drum can be controlled with the knob, making it ideal for dispensing liquids.
